

Melos Shabi

Front End Web Developer

I am a front-end developer who looks forward to creating visually appealing and user-friendly websites. With a strong foundation in HTML, CSS, JavaScript and React I am able to build responsive and interactive web pages that provide a seamless experience for users across all devices.

- Booking Website

Peje

CERTIFICATES

Responsive Web Design (05/2022 - 06/2022)

Learned HTML, CSS and how to use them for creating responsive websites <https://bit.ly/3LALjAn>

JavaScript Algorithms and Data Structures (06/2022 - 07/2022)

Learned JavaScript, data types, how to build interactive pages and code basic algorithms <https://bit.ly/3VyzBdT>

PERSONAL PROJECTS

Booking Website (03/2023 - 04/2023)

- Web app in which users can book different properties, add their own, save them, manage their profile etc.
- Used firebase to store the properties.
- Used React to render the properties on the front end.

Dealership Website (03/2023 - 03/2023)

- Website in which users can browse for cars, read the details of those cars and also look at the cars on a 360 degree angle.
- Used Firebase to store the cars' details.
- Used React to develop the front end and render the data fetched from Firebase.
- Used Sirv to create a 360 view from a set of images.

Chat App (02/2023 - 02/2023)

- Web app in which users within the same room can communicate.
- Used firebase to store the messages.
- Used the onSnapshot function of firebase for real-time messaging.

Blog Website (01/2023 - 01/2023)

- Web app in which users can create blogs delete them and edit their profile.
- Made use of React to develop the front end.
- Used Firebase for authentication and for storing users' posts.
