KEY SKILLS

HTML, CSS	TailwindCSS	React	Express.js	C#	Avalonia	PostgreSQL
JavaScript	TypeScript	React Native	Next.js	ASP.NET Core	MongoDB	Firebase

RELEVANT PROFESSIONAL EXPERIENCE

React Native Developer October 2025 - Present
MyEduIn

- Leading frontend rebuild of the company's cross-platform mobile app (iOS & Android) using Expo, TypeScript, GraphQL and Apollo Client, replacing the legacy codebase with a modern architecture.
- Implemented GraphQL query/mutation layer on the client side, integrating with backend APIs across core app features.
- Collaborated with design and backend teams on feature delivery and code reviews in an agile environment.

Full Stack Developer November 2024 - Present
Independent Contractor

- Designed and shipped full-stack web and mobile products end-to-end using React, Next.js, React Native, and ASP.NET Core, from architecture through deployment.
- Built real-time features including WebSocket-based messaging and Firebase integrations across web and mobile clients.
- Developed **iap-i.com** for an NGO client, a full-stack platform with a public-facing site and admin dashboard for managing courses, trainings, internships and news posts with Cloudinary image uploads tracked via WebSockets

Frontend Developer March 2023 - April 2024
Dolphins Group
Peje, Kosovo

- Built responsive, component-driven UIs for multiple client projects using React and TypeScript, with a focus on cross-browser compatibility and reusable component architecture.

PROFESSIONAL PROJECTS

Pulse April 2026
Next.js · ASP.NET Core · PostgreSQL · TypeScript

- Built and deployed an open source privacy-focused web analytics platform under Velovix, featuring a lightweight tracker script, real-time dashboard and GeoIP country detection. Live at pulse.velovix.com

IAP-I (iap-i.com) March 2026
Next.js · TypeScript · ASP.NET Core · MongoDB · Cloudinary · WebSockets

- Built a public-facing platform and admin dashboard for managing courses, trainings, internships and news posts with Cloudinary image uploads tracked in real-time via WebSockets.

QuranVoc (Mobile App and Landing Page) July 2025 - April 2026
Expo, React Native, TypeScript, C#, ASP.NET Core, MongoDB, Python, React, TailwindCSS

- Independently designed and shipped a cross-platform Qur'anic vocabulary app with spaced repetition, Surah reading mode, and 27-language support, plus a marketing site with scroll animations and device-aware deep linking. Live on the Play Store.

Buff Finder (Website and Mobile App) November 2024 - May 2025
Next.js, TypeScript, MongoDB, Express, WebSockets, React Native, C#, ASP.NET Core

- Built a full-stack geo-tagged offers platform with real-time DMs and Google Maps integration, shipping both a Next.js web app and a React Native mobile companion sharing the same backend and WebSocket infrastructure.

EDUCATION

Bachelor of Science, Computer Science
UNI-Universum International College

June 2026
Prishtina, Kosovo
